EDUCATION

University of Tennessee

Bachelor of Science in Computer Science. GPA: 3.0.

Knoxville, Tennessee

Spring 2027

EXPERIENCE

Student Worker

University of Tennessee, OIT Networking

May 2026 – Present

Knoxville, Tennessee

- Installed, patched, and configured Arista switches as part of the university network infrastructure team.
- Wrote software for Arista EOS to automate switch configuration workflows.

Student Intern, IT Helpdesk

Le Jardin Academy

Fall 2020 – Spring 2021

Kailua, Hawaii

- Performed Chromebook hardware repairs and classroom device troubleshooting.
- Handled software installation, general IT tasks, and troubleshooting of managed devices.

PROJECTS

Cross-Platform Reverse Shell and Team Server

- Developed a cross-platform reverse shell and team server using Golang and WebSockets.
- Used Donut to generate shellcode received and executed over HTTP via a custom loader.

Remote Monitoring and Management Panel

- Built a web-based RMM panel paired with a cross-platform agent written in Rust.

Discord Bot: Hypixel Login Notifications

- Built and maintained a Discord bot that delivered real-time login notifications for thousands of Hypixel players using the Minecraft Protocol and Hypixel API.

Chrome Extension

- Collaborated with a team of five to design and build a Chrome extension using React and TypeScript.

Windows Auto Clicker

- Developed a multithreaded Windows auto clicker in C++ using the Windows API.

Additional Projects

- Built a Minecraft username availability sniper using the Minecraft Protocol and Playwright.
- Wrote a CAPTCHA verification Discord bot for a personal Discord server.
- Developed a graphical calculator in Java Swing and a 2D game with procedural dungeon generation in Unity.
- Gained hands-on experience with static and dynamic code analysis, sandboxing, port and vulnerability scanning, hash cracking, brute forcing, reverse engineering, and web application debugging.

SKILLS

Languages: C++, C, Golang, Rust, Python, C#, Java, TypeScript, JavaScript, Haskell, RISC-V

Security Tools: Binary Ninja, Nmap, hashcat, Donut, Promon, Windows API

Tools and Frameworks: Playwright, React, WebSockets, Discord API, Hypixel API, Unity, Java Swing, Arista EOS

Areas: Offensive Security, Reverse Engineering, Static and Dynamic Analysis, Network Configuration, Web Development, Application Development
